Pedro is trying to incorporate more exercise into his busy schedule. He has several short exercise routines he can complete at home. Last week, he worked out for a total of 108 minutes by doing 3 arm routines and 3 abdominal routines. This week, he has completed 3 arm routines and 2 abdominal routines and spent a total of 92 minutes exercising. How long does each routine last?

Arm _____ Abdominal _____

Write an equation of a line in slope-intercept form.
